

# ONLINE EXAM REGISTRATION

## PART - A

### 1. PRIMARY USERS

- **Who?**  
Students
- **What they do:**
  - Register for examinations
  - Select exam subjects/papers
  - View exam schedules and details
  - Check registration status

### 2. SECONDARY USERS

- **Who?**  
Exam Administrator / Examination Department
- **What they need:**
  - Create and manage exams
  - Verify student registrations
  - Generate reports (registered students, exam-wise lists)
  - Monitor and control the registration process

### 3. OTHER STAKEHOLDERS

- **Who?**  
System Administrator / Technical Support Team
- **Their interest:**
  - System maintenance
  - User account management
  - Data backup and recovery
  - Ensuring system security and availability

## **Activity 2: Problem Statement – Online Exam Registration System**

Currently, the exam registration process in many institutions is handled manually or through inefficient systems, which causes delays, data errors, and inconvenience for students and administrators. Students face difficulties in registering on time, selecting correct subjects, and accessing accurate exam schedules. Administrators struggle with managing large volumes of registration data, verifying student details, and preparing reports manually.

The Online Exam Registration System will automate the exam registration process by providing a centralized digital platform. Students can easily register for exams, select subjects, and view schedules online. Administrators can efficiently manage exams, track registrations, and generate reports. This system reduces manual effort, minimizes errors, saves time, and ensures a transparent and user-friendly registration process.

## **PART -B**

### **Define Scope – Online Exam Registration System**

<b>What's IN SCOPE (We WILL build)</b>	<b>What's OUT OF SCOPE (We WON'T build)</b>
Student user registration and login	Mobile application version
Exam selection and exam registration	Online exam conduction
Viewing exam schedule and exam details	Online payment gateway integration
Basic exam registration confirmation	Advanced analytics or real-time dashboard
Simple reports (registered students list, exam-wise reports)	Multi-language support
Admin dashboard for exam management	AI-based exam recommendations
Manage student records and registrations	Biometric or remote proctoring system

## **PART-C:**

Project Name: Online Exam Registration System

Team Name: TECH TITANS

Date: 06-02-2026

Team Members: AK.SATHISHA- DELVOLPER

N. VENKATA NARASIMHA- PRODUCT MANAGER

K.BHANU GOUTHAM- Q/A MANAGER

S.YASHWANTH KUMAR- DOCUMENT MANAGER
