ONLINE EXAM REGRESTRATION

PART -B

Define Scope – Online Exam Registration System

The scope defines the boundaries of the Online Exam Registration System. It clearly explains what features will be developed in the current project and what features will not be included. Defining scope helps keep the project realistic, manageable, and achievable within one semester.

1. What's IN SCOPE (We WILL Build)

These features are essential for the basic functioning of the Online Exam Registration System and will be implemented in this project:

- **Student User Registration and Login**
  Students will be able to create an account and securely log in to the system.

- **Exam Selection and Exam Registration**
  Students can select available exams and register for them online.

- **Viewing Exam Schedule and Exam Details**
  Students can view exam dates, subjects, and other related information.

- **Basic Exam Registration Confirmation**
  After successful registration, students will receive confirmation of their exam registration.

- **Simple Reports Generation**
  The system will generate basic reports such as:

- List of registered students
- Exam-wise registration reports

- **Admin Dashboard for Exam Management**
  Administrators can create exams, manage exam details, and monitor registrations.

- **Manage Student Records and Registrations**
  Admins can verify, update, and manage student registration data.

2. What's OUT OF SCOPE (We WON'T Build)

The following features are not included in the current project due to time and complexity constraints. These can be added in future versions:

- **Mobile Application Version**
  The system will be web-based only.

- **Online Exam Conduction**
  Conducting exams online is not part of this project.

- **Online Payment Gateway Integration**
  Exam fee payment through online gateways will not be implemented.

- **Advanced Analytics or Real-Time Dashboard**
  Complex analytics and live data tracking are excluded.

- **Multi-Language Support**
  The system will support only a single language**.**

- **AI-Based Exam Recommendations**
  No artificial intelligence features will be included.

- **Biometric or Remote Proctoring System**
  Advanced identity verification methods are out of scope.

Conclusion

This defined scope ensures that the Online Exam Registration System focuses on core functionalities, making it practical and achievable within the given timeframe. Additional advanced features can be considered in future enhancements.
